

ESERCIZIO 1 (max 5 punti)

Heap-Stack-Metaspace: fotografare lo stato della memoria nel punto indicato nel metodo `main` della classe `Main`.

```
public class Main {
    Object o;
    public static void main(String[] args) {
        int k;
        String s;
        LongPlay lp=new LongPlay("Albedo 0,39","Vangelis");
        LongPlay rlp=new RemasteredLongPlay("Albedo 0,39","Vangelis",2024);
        String result=((LongPlay)rlp).toString();
        //FOTOGRAFARE LA MEMORIA IN QUESTO PUNTO
    }
}
```

```
public class LongPlay {
    private static int numberOfLongPlay;
    protected String title;
    protected String authors;
    public LongPlay(String title){
        this(title,null);
    }
    public LongPlay(String title, String authors){
        this.title=title;
        this.authors=authors;
        numberOfLongPlay++;
    }
    @Override
    public String toString(){
        return title+" "+authors;
    }
}

public class RemasteredLongPlay extends LongPlay {
    private int year;
    private String title;
    public RemasteredLongPlay(String title, String authors, int year) {
        super(title,authors);
        this.title=super.title+" "+year;
        this.authors=super.authors+" "+year;
        this.year=year;
    }
    @Override
    public String toString(){
        return super.toString()+" "+year;
    }
}
```

Consegnare:

- il file **Ex1.pdf** con il disegno dello stato della memoria, NON COMPRESSO.
